LUBE-IT ALL[®] DEEP LUBRICATING OIL DELIVERS LONG-LASTING, PROTECTIVE COATING

*Industrial-Strength Formula Reduces Friction, Abrasion and Corrosion on
All Metal, Plastic and Electrical Materials*

CLEVELAND – To help eliminate tough corrosion, friction or abrasion found in many industrial environments, maintenance technicians and plant managers can turn to Lube-It All[®] Deep Lubricating Oil, available only from Gasoila Chemicals.

Specially formulated to displace and repel moisture, Lube-It All contains a unique molybdenumdisulphide technology to lubricate all metal surfaces to prevent rust and corrosion. Available in 12- and 6-ounce spray cans, Lube-It All displaces 1,200 times its volume in water on surfaces.

Lube-It All does not conduct electricity, making it ideal for use on switches and solenoids. The deep lubricating oil also does not attract dust.

Engineered for use on all metal, plastic and electrical materials, Lube-It All instantly forms a robust coating that reduces friction and easily penetrates fine scratches and gaps to protect assembled parts and obstructed surfaces.

The lubricant is ideal in an environment between -300 degrees Fahrenheit to 450 degrees Fahrenheit (-184 C to 232 C).

Gasoila Chemicals is a division of Federal Process Corporation.

For additional product information, to place an order or to receive a free Gasoila product catalog or sample, please call **(800) 846-7325** or visit www.gasoila.com.

Gasoila Chemicals, a Federal Process Company, offers a diverse line of quality products for the petroleum, plumbing, LP Gas, HVAC, automotive and

general industrial markets. From industrial thread sealants and cutting oils to gas gauging pastes and industrial cleaning chemicals, Gasoila has long been the professional's choice for tough, reliable chemical products that get the job done.
