DIRTY JOB IN THE SERVICE BAY? GET A FAST, EASY CLEAN WITH POWER SCRUB® HAND CLEANER

***Makers of Free All® Deep Penetrating Oil Introduce Powerful New
Hand Cleaning Formula that Removes the Toughest Soils***

Cleveland, Ohio, March 2, 2006 – Professional technicians and do-it-yourselfers looking for a faster, more powerful hand cleaning can now rely on **Power Scrub® Hand Cleaner** from Federal Process Corporation.

Enhanced with highly effective grit scrubbers, Power Scrub is formulated to remove virtually any tough soil, including grease, adhesives, sealants, tar, and oil. This exclusive new formula can be used with or without water, making it an ideal choice for the service bay.

“Power Scrub is a proven technician productivity tool,” said Marc Spector, automotive manager, Federal Process. “We’ve received outstanding feedback from technicians and DIYers who have used this powerful yet soothing formula. Federal Process is proving there’s room for innovation in the hand cleaning category, just as we have in the rust penetrant segment with Free All Deep Penetrating Oil.”

Power Scrub features a blend of essential oils plus lanolin and aloe to protect and condition hands from multiple daily hand washing. This innovative formula does not “burn” cuts or scrapes. Power Scrub is available in two convenient sizes: a 15-oz. individual bottle and a group-use 1-gallon pump bottle. Small sample packets are also available. The cleaner is environmentally friendly and safe for drains.

For additional information on Power Scrub Hand Cleaner and any other leading professional and DIY products from Federal Process, please visit www.FreeAllOil.com or call 800-660-6140.
