

Herkules lift raises vehicles by wheels

The Herkules air-powered L-1200S Vehicle Lift raises vehicles by the wheels, providing a quick and efficient method for loading a vehicle on a lift. The pneumatic lift can be in-

ground mounted and is safe to use in spray booths, the company said. Features include straight up and straight down movement; removable and locking loading ramps; steel ratchet safety stops; air release valve; and a 5,000-lb. capacity.

Waytek die set available for mobile crimp tool frame

Waytek said a Weather-pack die set is now available for its mobile crimp tool frame. Already offering three other die sets for insulated and non-

insulated terminals, splices and lugs, this new addition offers more convenience, the company said. The mobile crimp tool frame is designed to be easy

to use with the snap-in dies. The wide range of one-piece dies meet most crimping needs, the company said.

The Weather-pack die set meets a full range of wire sizes from 12-20 gauge.

It can do insulator and conductor crimps at the same time, the company said.

Bend-Pak introduces new line of mobile lifts

Bend-Pak Inc. introduced a new line of heavy-duty mobile column lifts for

lifting trucks, buses or other commercial vehicles. The free-standing MCL-16 Mobile Column Lifting System is available in configurations of two, four, six or eight columns with lifting capacities ranging from 32,000 to 128,000 pounds. It is fully mobile, the company said. The system's controls are located on each column with up, down and emergency stop buttons.

Combination wrench offered

Kimball Midwest offers a wrench

that is designed to take care of spline drive, hex head, 12 point, 50-percent rounded, female torx, square head and damaged hex head fasteners.

The ratcheting system built into the head of each wrench provides faster and easier use, the company said. The non-slip open-end feature provides increased safety and grips fasteners with damaged hex heads.

The wrench also allows entry into tight fitting areas, while the 72-tooth design allows easy turning with a short arc swing, according to the company.

The Multi-Drive Geared Combination is available in fractional and metric sizes.

Lincoln offers grease guns

Lincoln said its new line of Clear Grease Guns allows for 100 percent

positive grease-type identification, eliminating the risk of mixing incompatible or unspecified grease. The clear grease tube provides visual confirmation of the quantity of grease remaining in the tube, air pockets and grease separation or contamination.

Capable of cartridge and bulk fill use, the high-strength, clear tube with aluminum end caps combines for one of the industry's most durable tube assemblies, the company said.
