TEAR DOWN BENCH

Shure Manufacturing Corporation claims it has a versatile Oversized Tear Down Bench that eases the task of working with fluid-saturated components. These benches eliminate unsafe spills, speed work on transmissions, small engines and hydraulic systems. Features include:

- Reinforced steel top
- ½-inch lip on all sides, all-welded legs and four heavy-duty swivel casters with brake
- Storage drawer with optional lock is standard on tear down bench models
- 3-gallon fluid drain pan
- Powder coat paint finish — choose from 22 Shure Signature Colors
- Shipped unassembled. Specifications: 60 inches x 32 inches. Height adjusts from 29 inches to 40 inches

POWER SCRUB

Utilizing the company's powerful Tub-O Towels formula, Power Scrub Hand Cleaner from Federal Process Corporation offers a quick and easy clean for those who face tough soils, grease, adhesives, sealants, tar, oil and more on a daily basis. Specially formulated for professional technicians and do-it-yourselfers, new Power Scrub uses highly effective grit scrubbers and is engineered to be used with or without water. The tough grit attacks heavy grime and soils for simple removal through wiping or rinsing. The environmentally friendly cleaner also is safe for drains. To prevent peeling or cracking, Power Scrub features a blend of essential oils plus lanolin and aloe to protect and condition hands from multiple daily hand washing. This innovative, balanced pH formula also does not "burn" cuts or scrapes. Power Scrub is offered in several sizes including new individual, single-use packs, plus a 15-oz. individual bottle and a group-use 1-gallon pump bottle.

SHEETING AND MASKING LINE

Bondo Corporation has re-launched a new consolidated line of Marson KWIKEE brand sheeting and masking products. The new line consists of everything a shop needs to protect seats, wheels, floors and entire cars from compact cars to full-size SUVs and large trucks. The Marson KWIKEE line offers a wide variety of products that are economical, easy to use and provide car or boat protection during painting, storage or service, according to the company. Each product is resistant to urethanes, lacquers, solvents, paints and primers. Included in the new line is the Corona treated Cling Guard plastic sheeting product. This sheeting product has special adhesion properties that prevent flaking, which can cause contamination of wet paint during the painting process.
